# Razib Hasan

## Software Engineer

## About me

Passionate and results-driven software developer eager to take on a dynamic role in a challenging environment. I am particularly drawn to opportunities in software automation, embedded systems/IoT, cloud computing, and data-driven machine learning projects. With a solid foundation in C++, Python, and Java, I am excited to leverage my skills to contribute to innovative solutions in these domains.

## Work Experiences

Project Manager

Feb 2024-- Ongoing

**Tampere University of Applied Sciences**

Leading a team as Project Manager for a school project. Objective of the project is to build an integrated networking system for 3D printers. Used technologies in this project such as RaspberryPi, Flask, IDM, Data management (SQL), AutoSSH, SSH tunnel, Cloud hosting and Automation.

Market Research Assistant

Jun 2019-Dec 2019

**Kajaani University of Applied Sciences**

I assisted in project planning and controlling for KAMK that related to educational expansion in international market. I also participated actively in implementation process. Main tasks consist of analyzing data, financial planning, initiating collaboration, maintain customer relation, marketing plan, product development, pricing and sales pitch.

Market Research Analyst

Oct 2018-Mar 2019

**Kajaani University of Applied Sciences**

Main task included collecting relevant data about all the states in India to make comparable individual profile for each state. Project aimed to find a suitable state for virtual educational collaboration.
